

CS6329.001: Project Deliverable – 1

Due Date: Sunday, February 14, at midnight

Description: For this deliverable you will be responsible for developing the use cases associated with the system described in the Project Description document. This part of the project will fully explore as many use cases as you can think of, as well as fully documenting the key use case.

Items to be delivered: The items you will deliver in this deliverable are:

1. A prioritized list of Uses Cases, by name identifier only
2. A Use Case diagram, showing the Primary actor, secondary actors, and the their associations to the use cases you identified in this phase
3. A fully dressed use case for the Process Sale scenario; use the book for a template.
